Monitoring Requirements Not Met for 2013 4th Quarter Nitrate/Nitrite

Our water system violated several drinking water standards over the past year. Even though these were not emergencies, as our customers, you have a right to know what happened and what we did to correct these situations.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During October through December of 2013 we missed sampling for nitrates and nitrites and therefore cannot be sure of the quality of our drinking water during that time.

What should I do?

There is nothing you need to do at this time.

The table below lists the contaminant(s) we did not properly test for during the last year, how often we are supposed to sample for nitrates and nitrites and how many samples we are supposed to take, how many samples we took, when samples should have been taken, and the date on which follow-up samples were (or will be) taken.

Contaminant	Required sampling frequency	Number of samples taken	When all samples should have been taken	When samples were or will be taken
Nitrates/Nitrites	Quarterly	3 of 4	Once during each quarter	Samples taken on 2/14

What happened? What was done?

The fourth quarter sample of 2013 was missed and the 1st quarter sample for 2014 was taken and found to have no MCL exceedance for nitrate/nitrite.
